

ECO and OHS Policies

ECO Policy

As a responsible global corporate citizen, Moxa is committed to balancing economical growth with a healthy respect for the environment. The following environmental protection guidelines are a key component of Moxa's operation.

Products

Moxa's green product design emphasizes using recyclable materials, and requires compliance with international norms and customers' specific green product requirements.

Manufacturing

Moxa's manufacturing guidelines require compliance with government environmental regulations, and emphasize working with suppliers who follow well-established environmental management systems, such as ISO 14001.

Environment

In an effort to help conserve the Earth's precious natural resources, Moxa continually promotes energy conservation, the reduction of carbon emissions, and the recycling and reuse of resources.

OHS Policy

Moxa is committed to establishing an effective occupational safety and health management system to maintain a safe, healthy, and happy work environment for Moxa employees.

Work Environment

Systems and procedures have been established to ensure that Moxa's work environment is hazard-free and complies with OHSAS regulations.

Staff Awareness

Staff members are required to take part in educational and training activities to enhance health and safety awareness and to ensure complete understanding of OHSAS rules and regulations.

Educational and Leisure Activities

Employees and family members participate in a wide range of leisure and educational activities to promote good work habits, and a healthy and happy life.
