

# Proactive Monitoring Software Package (Windows edition) Release Notes

<b>Version: v2.2</b>	<b>Build: Build 210611</b>
<b>Release Date: Aug 02, 2021</b>	

## Applicable Products

DA-820C Series, DA-682C Series, DA-681C Series, DA-720 Series, MC-1100 Series, MC-1200 Series, MC-7400 Series, V2201 Series, V2403C Series, V2406C Series

## Supported Operating Systems

Windows 10

## New Features

- Supports the monitoring of the RAID (Redundant Array of Independent Disks) system, including RAID Status, RAID Mode, and RAID Redundancy Status.

## Enhancements

N/A

## Bugs Fixed

- Scan Interval allows pasting of strings using Ctrl + V keyboard shortcut.
- Scan Interval that is too short or frequent scanning leads to incorrect information in the Network Interface List.
- If the number of disk partitions is > 19, enabling any alarm results in the tool crashing.
- If the total size of a partition < 1 GB, "total size" is replaced with "free size" in the UI.
- [API] GetPartitionCount fails when the number of partitions > 9.
- Local Relay is not triggered.
- Mainboard Temperature exceeding the threshold value does not trigger a Windows event log.
- Disabling/enabling Network Interfaces cause incorrect Proactive Monitoring Network Status.

## Changes

N/A

## Notes

N/A

<b>Version: v2.1</b>	<b>Build: Build_200505</b>
<b>Release Date: Dec 10, 2020</b>
