Applicable Products

CN2510

Supported Operating Systems

SCO UNIX

New Features

N/A

Enhancements

N/A

Bugs Fixed

N/A

Changes

N/A

Notes

This release includes the network printing utility. The CN2000 printer port must be set to PRINTER mode before trying to print. Otherwise, the example program may not function as expected.

TCP/IP development tools/libraries are required on your system. The example program was developed under SCO v3.2.4, and there may be some differences in file or network library names. For more information, please refer to the included README.
