

EDR-G9004 Series

2 Gigabit copper + 2 Gigabit copper/SFP combo port industrial secure routers

Features and Benefits

- 4-port Gigabit all-in-one firewall/NAT/VPN/router
- Gen3 LAN Bypass for system fault tolerance
- Dual WAN redundant interfaces through public networks
- Next-generation industrial firewall with Intrusion Prevention/Detection System (IPS/IDS)
- Visualize OT security with the MXsecurity management software
- Secure remote access tunnel with VPN
- Examine industrial protocol data with Deep Packet Inspection (DPI) technology
- Easy network setup with Network Address Translation (NAT)
- -40 to 75°C operating temperature range (-T model)

Certifications

Introduction

The EDR-G9004 Series is a set of highly integrated industrial multi-port secure routers with firewall/NAT/VPN functions. These devices are designed for Ethernet-based security applications in critical remote control or monitoring networks. These secure routers provide an electronic security perimeter to protect critical cyber assets including substations in power applications, pump-and-treat systems in water stations, distributed control systems in oil and gas applications, and PLC/SCADA systems in factory automation. Furthermore, with the addition of IDS/IPS, the EDR-G9004 Series is an industrial next-generation firewall, equipped with threat detection and prevention capabilities to further protect critical infrastructure from cybersecurity attacks.

Defend Against Malicious Threats With Advanced Cybersecurity Features

The EDR-G9004 Series' embedded firewall uses policy rules to control network traffic between trusted zones while Network Address Translation (NAT) shields the internal network from unauthorized access by outside hosts. The Virtual Private Networking (VPN) functionality further provides users with secure communication tunnels when accessing the private network from the public Internet. To help protect your OT assets from cyberattacks, the EDR-G9004 Series supports Deep Packet Inspection (DPI) to examine the data portion of network packets for various OT-specific protocols.

Simplify Configurations With the User-friendly Interface and Quick Settings

The EDR-G9004 Series' Setup Wizard provides an easy way for users to set up DMZ ports to create a secure network buffer zone in just three steps. In addition, the object-based firewall management feature gives engineers a simple way to configure and maintain firewall filtering for IP addresses and subnets, network services, industrial application services, and user-defined services.

Industrial-grade Design to Ensure Uninterrupted Network Connectivity

The EDR-G9004 Series' rugged hardware makes these secure routers ideal for harsh industrial environments, featuring wide-temperature models that are built to operate reliably in hazardous conditions and extreme temperatures of -40 up to 75°C. Moreover, the EDR-G9004 Series supports WAN, Layer 3 redundancy mechanisms, and Gen3 LAN Bypass fault tolerance to ensure that your network stays connected at all times.

Virtual Patching and Intelligent Threat Protection

Patching remains a major challenge in OT environments because OT applications cannot afford interrupting operations by shutting down systems to apply patches. Virtual patching technology can help complement existing patch management processes by shielding known and unknown vulnerabilities. In addition, the EDR-G9004 features intelligent IPS functionality for continuous protection against cyberthreats which uses pattern-based detection to identify and block known attacks.

MX-ROS Addresses Growing Cybersecurity Threats

Moxa's MX-ROS is a software platform for industrial security routers and firewalls. The platform supports robust security and user-friendly operation of secure routers through simplified web and CLI interfaces. MX-ROS devices offer a wealth of the latest cross-industry Operational Technology (OT) network management features with each release to safeguard your hardware and software.

Serial Interface

Console Port	RS-232 (TxD, RxD, GND), 3-pin (115200, n, 8, 1)
Connector	USB Type-C

Power Parameters

Connection	Removable terminal block
Input Voltage	12/24/48 VDC, redundant dual inputs (DNV-certified for 24 VDC)
Operating Voltage	9.6 to 60 VDC
Input Current	1.01 A @ 12 VDC 0.51 A @ 24 VDC 0.27 A @ 48 VDC
Reverse Polarity Protection	Supported

Physical Characteristics

Housing	Metal
IP Rating	IP40
Dimensions	45 x 135 x 105 mm (1.77 x 5.31 x 4.13 in)
Weight	800 g (1.76 lb)
Installation	DIN-rail mounting (DNV-certified) Wall mounting (with optional kit)

Environmental Limits

Operating Temperature	Standard Models: -10 to 60°C (14 to 140°F) DNV-certified for -25 to 70°C (-13 to 158°F) Wide Temp. Models: -40 to 75°C (-40 to 167°F)
Storage Temperature (package included)	-40 to 85°C (-40 to 185°F)
Ambient Relative Humidity	5 to 95% (non-condensing)
