Introduction

The TAP-323 Series Wi-Fi 4 (802.11n) railway train-to-ground wayside IP68-rated dual-radio wireless APs are built for CBTC, CCTV, and BBRS communications, supporting seamless controller-based Turbo Roaming with handover times under 50 ms. They are highly compact and rugged wireless units combining two access points, a managed fiber switch, and a wide-range AC/DC power supply into a single box. The TAP-323 Series can supply power to up to four PoE devices while providing reliable LAN communications powered by Moxa's Turbo Chain technology.
